

swine

Enhancing performance in sows

Product benefits

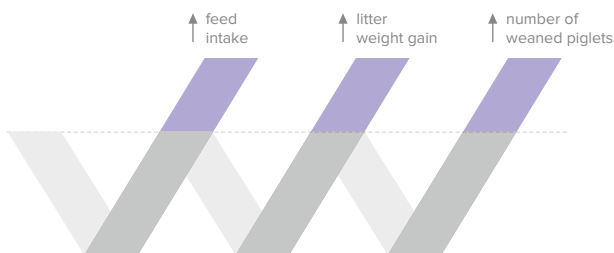

- increases feed intake
- improves litter size and litter weight gain
- shorter reproduction cycle
- better body condition

Dosage recommendation

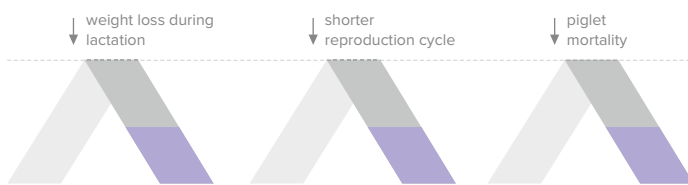

300-400 g/mt in sows
in compound feed

FRESTA® F
is stable in pelleted feed

Effects of Delacon **FRESTA® F** on performance:

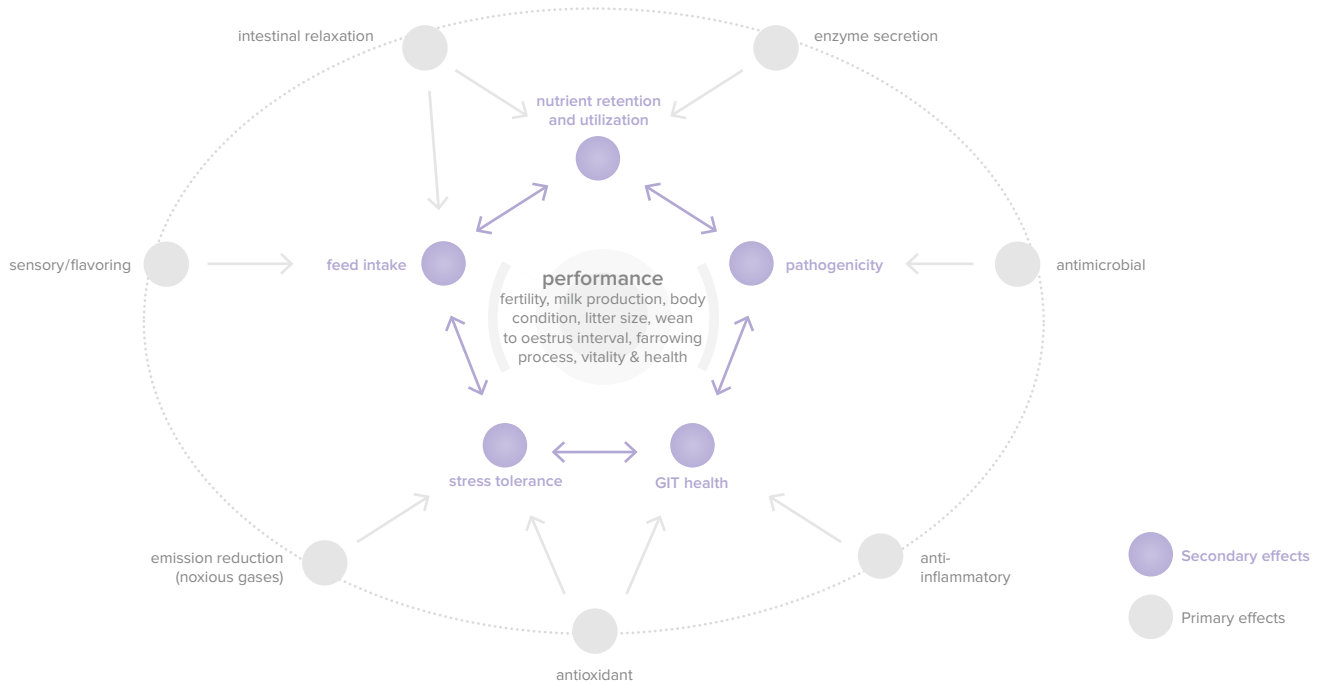

beneficial effects of Delacon **FRESTA® F** (%)

beneficial effects of Delacon **FRESTA® F** (%)

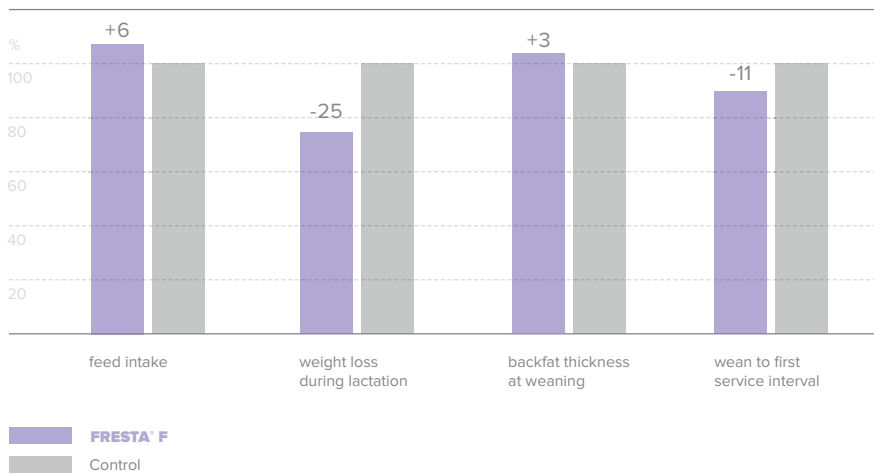

Further benefits

- enhances nutrient utilization
- increases milk yield and quality
- improves stress resistance
- reduces inflammation
- improves fertility
(including wean to oestrus interval, litter size, body condition, farrowing process)

Trials with sows

average effects (%)

Trial design:

18 trials (2002-2012)

trial dosage: 250-400 ppm Delacon **FRESTA F**

Trial locations:

Europe, Brazil, Korea, Thailand, Philippines, China, Malaysia, USA

Phytogenic substances

Essential oils

Micro-encapsulated essential oils proven to stimulate appetite, enhance the secretion of digestive juices and provide antioxidant properties.

Herbs

Regulate capillary permeability, inhibit inflammation mediators.

Spices

Activate blood circulation and metabolic processes including detoxification, stimulate secretion of digestive enzymes.

Mucilages

Protection of intestinal epithelium, prevention against pathogens.

Flavonoids

Bind to free radicals in animal organisms, modulate the activity of enzymes, act as antioxidants.
